

NEW PRODUCTS 2010

NEW COMPOSITE TUBES

These composite tubes are designed for maximum strength and durability. They are made from a special blend of carbon fiber and Kevlar, which makes them lighter and stronger than traditional aluminum tubes. They are also resistant to corrosion and can withstand high temperatures. They are perfect for use in a variety of applications, from racing to utility work.

GEAX AKA XC & TRIAL TIRE

The Aka was designed for situations where the knobs have to penetrate the ground without digging. Aggressive side knobs provide reliable cornering.

A versatile XC and trail tire, the AKA has no equals for grip and low rolling resistance whether the terrain is rock, gravel, sand or even grass.

STAND NO.
A1/407
